DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

2. Within each of the planter system, there is lack of unity between the following patentably distinct species:

Elect from one of these distinct Species:

Species 1: The embodiment of the planter system of Figs. 1A and 1B.

Species 2: The embodiment of the planter system of Figs. 2A and 2B.

Species 3: The embodiment of the planter system of Fig. 8.

3. Within each of the planter, there is lack of unity between the following patentably distinct species:

Elect from one of these distinct Species:

Species 11: The embodiment of the planter of Figs. 4A and 4B.

Species 22: The embodiment of the planter of Figs. 5A and 5B.

Species 33: The embodiment of the planter of Fig. 7.

4. Within each of the tray, there is lack of unity between the following patentably distinct species:

Elect from one of these distinct Species:

Species A: The embodiment of the tray of Figs. 1A and 1B.

Species B: The embodiment of the tray of Figs. 2A and 2B.

Species C: The embodiment of the tray of Figs. 3A-3E.

Art Unit: 3644

5. Within each of the drainage tube system, there is lack of unity between the following patentably distinct species:

Elect from one of these distinct Species:

Species AA: The embodiment of the drainage tube system of Figs. 6A-6C.

Species BB: The embodiment of the drainage tube system of Figs. 9A and 9B.

6. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, it appears that there is no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 3644

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
